OVERALL DIABETES RISK SCORE

High diabetes risk detected

Based on your biomarkers, your predicted diabetes probability is 60%. Several key indicators are above healthy thresholds. Immediate consultation with a healthcare provider is strongly recommended for formal testing and evaluation.

FEATURE IMPORTANCE

Plasma Glucose	24%
BMI	18%
Age	14%
Diabetes Pedigree	12%
Serum Insulin	10%
Blood Pressure	9%
Pregnancies	7%
Skin Thickness	6%

RISK FACTOR ANALYSIS

**Plasma Glucose: 120**

Slightly elevated. Pre-diabetic range suggests monitoring needed.

**BMI: 32**

Overweight range. Even 5-7% weight loss reduces risk by 58%.

**Age: 33**

Younger age reduces risk. Build healthy habits now.

**Diabetes Pedigree: 0.47**

Low genetic predisposition.
